Cloud Collections You Can Trust

Use Casepoint to Take Control of Your Data.
Preserve Critical Data and Collect with Ease.
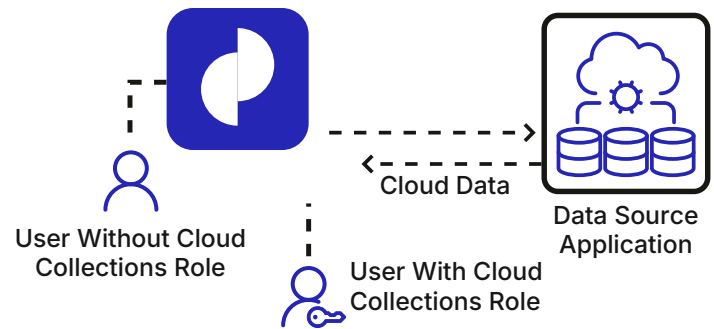

▶ Collect Data Directly

Stop settling for "good enough" — and start using the fast, secure, and cost-effective cloud collection tools that drive modern eDiscovery. With Casepoint, you can collect directly from today's most popular platforms, including Slack, Microsoft 365, Gmail, Google Drive, Outlook Exchange, Dropbox, Box, and more.

Casepoint's connectors are integrated with our technology ecosystem from the ground up. We continuously expand and launch new data integrations to meet the growing number of cloud sources and the needs of individual customers.

◗ Control Data Access

With Casepoint's Role-Based Access Controls (RBAC), you control what is collected and who can access that data. Casepoint's detailed user role configurations allow you to govern which users have permission to use the cloud collection module to create queries and perform the collections, and who can then interact with the resulting data.

◗ Casepoint's Cloud Collections Make it Easier Than Ever to:

Set defined roles with targeted permissions within Casepoint to enable access for specific users.

Ensure full support for encrypted authentication for every cloud source.

Reduce cloud security risks and maintain privacy, always.

Get More With Cloud Collections

Security
Protect your most sensitive data with Role-Based Access Controls (RBAC) and data redundancy.

Direct Collection
Collect directly and seamlessly from cloud-based platforms.

Accessibility
Access your data anytime, anywhere.

Scalability
Expand storage and resources as your needs grow, or scale down as your data needs change.

Cost-Effectiveness
Cut spending with pay-as-you-go pricing models.

Collaboration
Facilitate seamless collaboration among team members within a single platform.

Centralized Data
Manage data from multiple sources in one, single application.

How Can We Help You?
Get in touch with the Casepoint team to see how we can best support your cloud collection needs.
